

THE ONLY SAN SO SOPHISTICATED, IT'S SIMPLE

With a single architecture, a single interface and every feature imaginable, the benefits of a Compellent SAN go beyond the sophistication of individual features to create a simple, all-in-one solution that saves your time, money and data.

A Modular Hardware Architecture with Unlimited Flexibility

Unmatched Investment Protection with Standards-based Hardware

Mix and match any server interface or drive technology and easily integrate new technologies without replacing or discarding your existing investments.

Scale Without Limits

Build your system as you grow, scaling capacity, connectivity and capability incrementally to match demand rather than purchasing resources up front.

Uninterrupted Data Access

Architected for high availability with fully redundant hardware and advanced failover features. Clustered controllers provide a superior level of availability.

A Combination of Innovative Software Applications

Automated Tiered Storage

Automatically classify and migrate data to the optimum tier of storage based on usage. Fast Track extends the benefits of Automated Tiered Storage to every drive.

Thin Provisioning

Provision unlimited volumes from a single virtualized pool, yet only consume physical capacity when data is written by the application. Convert legacy volumes into thin provisioned data and optimize space utilization in Windows environments.

Remote Replication

Ensure business continuity at a fraction of the cost of other replication solutions with affordable Thin Replication.

Continuous Snapshots

Create an unlimited number of space-efficient copies to provide extremely fast and reliable recovery from any data hazard.

Unified Interface Places Enterprise Storage at Your Fingertips

Manage More Storage in Less Time

Storage Center's intuitive interface cuts administrative time in half by automating time-consuming, repetitive storage monitoring and capacity-planning tasks.

Unprecedented Ease of Use

A single unified interface spans the entire set of technologies, capabilities and configurations, making it substantially easier to manage.

Vastly Expand IT Capabilities

Any administrator can manage any amount of storage and complete even complex storage tasks in less than 10 minutes. Reducing complexity increases admin productivity.

"We believe Compellent's integrated management features will help UNT save more than \$2 million over a two-year time span compared to our previous SANs."

TOM MCELWEE
Director, Enterprise Technical Services
University of North Texas

"The Compellent SAN has helped us reduce our data center footprint and more efficiently use the power and cooling storage requires."

GREG FOLSOM
Senior Vice President of Information
Technology
Arnold Worldwide
